Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 2, it is not clear to what ends reference is being made. Is applicant referring to ends of the support member or ends of the vehicle? In addition, lines 4 and 5 are somewhat confusing. It appears the weak point provided in the vicinity of a fixing section should be provided with some structural relationship with the support member set forth in line 2.

In claim 3, line 3, there is no antecedent basis for "said vehicle fixing section". It appears claim 3 should depend from claim 2.

In claim 4, line 2, there is no antecedent basis for "said first weak point" and "said second weak point". It appears claim 4 should depend from claim 3.

In claim 5, line 2, there is no antecedent basis for "said second weak point".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Goto et al (U.S. patent 6,237,185).

The patent to Goto discloses the invention as is claimed (see figs. 1 and 2), including a vehicle having a wiper arm (WA) for driving a wiper blade (not shown but disclosed) across a windshield. A wiper motor (6) drives said arm and is attached to the vehicle in a manner that allows it to move inside the vehicle body upon application of an external force.

With respect to claim 2, note first support (2) which is fixed at one end to the vehicle and swingably attached at another end by pin (7). Note that a weak point defined by cutout (14) is provided near the pin (7). Such cutout has low rupture strength.

With respect to claim 3, in-so-far as such is definite, note figure 5 wherein a support (9) is provided that is fixed at both ends to the vehicle. Also note weak point (17a) with low rupture strength.

With respect to claims 4-6, note that shaft (4) is rotatably supported by a "pivot holder". Said shaft supports wiper arm (WA).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
